

3-Day Hands on Workshop - RF Circuit Design – PA and LNA for Telecom / Defence / Industrial Market Applications

Date: To be announced, once we have minimum participants enrol
 Time Duration: 9:00am to 5:00pm
 Location: To Be decided as per customer request

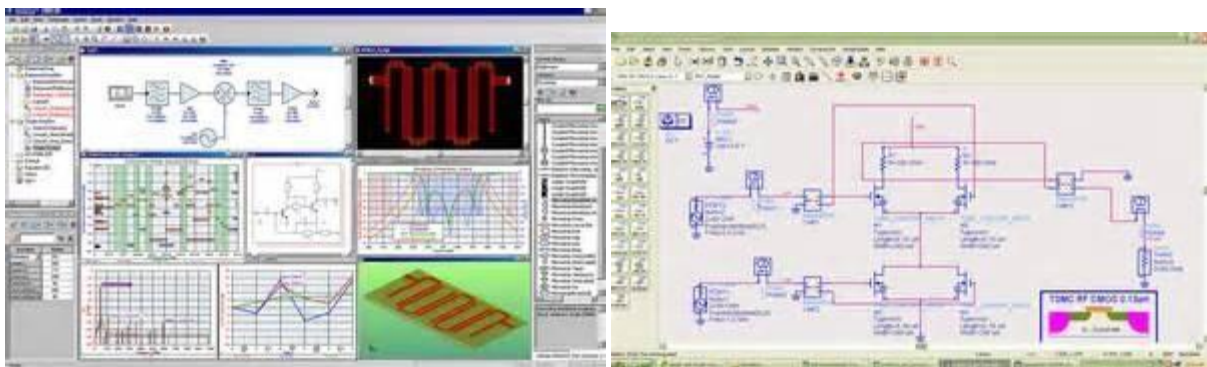

Course Description

This 3-Day workshop addresses the following key areas: Practical hands on how to “**RF circuit design simulation using ADS**”, Linear circuit design covering LNA and Filter, Non-linear circuit design covering Power Amplifier. PA design will use High power LDMOS / GaN devices in CW / Pulse mode operation and High efficiency PA.

Advanced Design System is the world’s leading electronic design automation software for RF, microwave, and high speed digital applications. In a powerful and easy-to-use interface, ADS pioneers the most innovative and commercially successful technologies, such as X-parameters* and 3D EM simulators, used by leading companies in the wireless communication & networking and aerospace & defense industries. For WiMAX™, LTE, multigigabit per second data links, radar, & satellite applications, ADS provides full, standards-based design and verification with Wireless Libraries and circuit-system-EM co-simulation in an integrated platform.

Key Benefits of ADS

- Complete, integrated set of fast, accurate and easy-to-use system, circuit & EM simulators enable first-pass design success in a complete desktop flow
- Application-specific Design Guides encapsulate years of expertise in an easy-to-use interface
- ADS is supported exclusively or months earlier than others by leading industry and foundry partners

Laptop with ADS software installed will be required for hands on session. Temporary ADS licenses will be provided to all

Finetuning Academy LLP

Who should attend?

RF Engineers / Scientists interested in pursuing RF design, familiarity with RF Fundamentals is a pre-requisite
Students pursuing Masters / PhD in RF & Microwave, Communication systems

By taking this course, you will better understand

- Linear circuit design – LNA using ADS with example
- Non-linear circuit design – High Power Amplifier using ADS

Learning Objectives

- Best practices in using ADS for RF design and simulation – Advanced Techniques
- LNA & Filter – design, simulation, EM analysis through co-simulation
- PA – with LDMOS / GaN technology, Non-Linear device Models, Pulsed / CW mode operation

Workshop Sessions & Schedule

Topics, Day-1	Time
Linear Circuit design - Small Signal Active devices	900-1030
Tea Break	1030-1045
LNA design and simulation (ADS Example) - I	1045-1300
Lunch Break	1300-1345
LNA design and simulation (ADS Example) - II	1345-1500
Tea Break	1500-1515
LNA design and simulation (ADS Example) - III	1515-1630
Interactive Session	1630-1700
Topics, Day-2	Time
Linear Circuit design - Passive Components	900-1030
Tea Break	1030-1045
Filter design and simulation (ADS Example)	1045-1300
Lunch Break	1300-1345
Non-Linear Circuit design - Power Amplifier	1345-1500

Tea Break	1500-1515
PA design using LDMOS (Simulation example) - I	1515-1630
Interactive Session	1630-1700

Finetuning Academy LLP

Topics, Day-3	Time
PA design using LDMOS (Simulation example) - II	900-1030
Tea Break	1030-1045
PA design using LDMOS (Simulation example) - III	1045-1300
Lunch Break	1300-1345
PA design using GaN (Simulation example) - IV	1345-1500
Tea Break	1500-1515
PA design using GaN (Simulation example) - V	1515-1630
Wrap Up	1630-1700

Speaker

Bhupinder Singh received his Master's Degree in Microwave System Design from IIT- Kanpur, India. He has extensive experience in product design and development both in India and abroad. In his 27+ years of experience, he has designed, developed and tested numerous RF system / subsystem used by Govt, Military, and Cellular, VSAT industry.

He is currently Director-Technical at RF Specialities and Finetuning Academy LLP.

Previously he worked as a scientist at DRDO-Aeronautical Development Establishment, Bangalore, from 1991-2001. Later, he was leading R&D team at HFCL, DMC-STRATEX in NZ, Blackbay in NZ, Technical Head- Telecom R&D at Astra MWP, Eminent Technology, Italy.

He is an advanced user of Simulation tools like ADS, SystemVue, EM Pro, MWO-AWR, ALTIUM and ACAD. He is skilled at using Spectrum Analyzer, NW Analyzer, Vector Signal Analyzers, signal generators.

Finetuning Academy LLP is focused in RF circuit, system and MMIC design training services. Delivered advanced and basic trainings using RF design software tools, by Industry Experts with over 25+ years of Experience from ISRO, BEL, DRDO.

RF Specialities (RFS) is one of the leading companies in the design, development, servicing and maintenance of RF Equipment in India. RF Specialities is a leading supplier of customized RF Systems/ subsystems to Govt., military and commercial market. Boasting of a state-of-the-art RF laboratory at Bangalore and backed with experienced & well-trained manpower, it provides unique and cost-effective solutions in the shortest turnaround time for the satellite, broadcasting, telecom and military industry.
